Restoration, Consolidation and Conservation

Liberty Column
Gibside Monument, Newcastle

National Trust Project

Lightning conductor systems are designed, installed and maintained to clients' needs, and comply with BS6651/1999, English Heritage and EIG requirements. Our work includes maintaining and upgrading long-standing lightning conductors of Franklin Rod or Faraday Cage formats. Earth resistance testing and improvements are undertaken with certification to EIG or quinquennial report requirements. Flagstaves and weather vanes are often included in these works.

Typical works have been undertaken at:

- St Paul's Cathedral**, London (Surveyor to the Fabric);
- Bishopsthorpe Palace**, York (Diocese of York);
- Queen Mary College**, Thirsk (Bursar);
- Ripon Minster**, (Architect and roofing contractor);
- Brizlee Tower**, (Architect and Northumberland Estates);
- Hexham Abbey**, (Architect and PCC).

- Rope access, vegetation control and masonry. Conservation on ancient monuments, church listed and historic buildings, eg. Bolton Priory and Barden Tower, Marsden Cliffs.
- Ladder and rope access surveys of high structures (+video, CCTV, photographic evidence and presentation reports) eg. Holy Trinity Church, Leeds and Pendower Hall, Newcastle.
- Steeple, tower and spire restoration to masonry, ironwork and weather vanes, rainwater systems. eg. Masham Church and St. Margaret's Church, Brotten.
- Leadwork- renewals and maintenance. eg. St. Helen's Church, Skipwith.
